## ABOUT E-BOOST

---

Sustainable mobility is at the core of the European strategy to accelerate the ecological and digital transition, as the transport sector is a major contributor to GHG emissions.

E-BOOST aims at supporting European **electromobility** SMEs to recover from the COVID-19 crisis with a **range of services** to strengthen their resilience, green and digital transformation, and internationalization.

E-BOOST targets high-profile SMEs addressing unmet needs in electromobility from all mobility sectors: automotive, industrial vehicle, active mobility railway, maritime, etc. Even the youngest companies, still unexperienced but with high potential, will be considered in the process.

The overall aim of the Open Calls is to identify products innovations in order to reduce dependency on critical inputs and technologies in the electromobility value chain, to introduce new-to-firm products or services, and to engage actors from regions with different levels of economic development.

## ABOUT THE OPEN CALLS

---

### E-BOOST Consortium has launched 3 Open Calls:

- 1 Products & Services Development :
  - Bottom-up challenge
  - Clean Hydrogen challenge
- 2 Innovation Support Services
- 3 Mobility Lump Sum to SOLUTRANS

Register
